

# Transact One

## Campus ID

### Harness The Power Of One Connected Experience

Transact One is an integrated, cloud-native, and mobile-first ecosystem that provides a one-mobile-app or single-site experience for both students and administrators. It successfully brings together Payments, Campus ID, Commerce, and third-party software—no more clunky websites or an overwhelming number of complex apps.

Deliver a seamless experience across campus with standards-based, scalable technologies and common data integrations.

**1** Students and staff have a single point of access and are ready to go with their Institution credentials from day one.

**2** Once signed on, users experience an integrated UX with a modern, university-branded design, and common profile.

**3** Data integrations are simplified with a single API gateway and pre-certified partner flows. Drag-and-drop graphical tools eliminate custom coding overheads.

**4** Data analytics & reporting are natively built in—providing unique insights into operational effectiveness and an enhanced student experience.

**Access on your mobile device!**

# Create A Cashless Environment For Your Students

As the first solution on the Transact One platform, Transact IDX enables a cashless environment for your students – one card or mobile credential gives students access to purchase meals, do laundry, pay for printing, and buy snacks at the vending machine.

Student life is all about convenience. Provide transaction services that give students an easy, cashless way to pay for any combination of meal plans and stored-value accounts. Plus, mobile app or online account access helps students better manage their campus accounts.

## Mobile Credential

Turn a smartphone into a student ID with a fast, secure NFC-enabled mobile credential for Apple Wallet and Google Pay.

## Stored-Value Accounts

Assign students multiple accounts to be used with all types of credentials and point-of-sale (POS) systems for merchants, both on and off-campus.

## Meal Plan Accounts

Provide a mix of plan types, flex accounts, and more. Integrate with POS systems and accommodate all types of dining locations.

## Online Account Management

Allow students to view transactions and balances, add value, and manage their account through a school-branded, online account management portal.

## Hardware & Partner Integrations

Leverage existing investments and get up and running quickly with our robust hardware and partner application ecosystem.

## Point-of-Sale Applications

Provide students convenient and quick access to account funds with a complete range of fully integrated POS applications, including real-time mobile ordering, self-service kiosks, and mobile registers.

## Card Production integration

Integrate campus card production with your transaction and security solutions for a seamless and consolidated end-to-end experience.
